## Description

The breather tube and oil heater kit is recommended for improved cold starting in locations where the ambient temperature drops below 0°C (32°F).

The breather tube heater wraps around the crankcase breather tube below the air cleaner. The oil heater is inserted into the oil drain port and includes a port for the oil drain valve. The oil heater power cord connects to the breather tube heater.

Breather tube and oil heater kits are available in 120-volt or 240-volt versions. Kits include a 3-way extension cord (120-volt kits) or a harness adapter (240-volt kits) to allow connection of multiple AC accessories.

**Note:** The heaters require a continuous source of AC power that is backed up by the generator set.

## Breather Tube Heater Specifications

Kit Number	GM102231-KP1-QS GM102231-KP3-QS	GM102231-KP2-QS GM102231-KP4-QS
Voltage	120 VAC	240 VAC
Watts	50 W	50 W
Thermostat ON	4°C (40°F)	
Thermostat OFF	13°C (55°F)	

## Oil Heater Specifications

Kit Number	GM102231-KP1-QS GM102231-KP3-QS	GM102231-KP2-QS GM102231-KP4-QS
Voltage	120 VAC	240 VAC
Watts	75 W	75 W
Thermostat ON	4°C (40°F)	
Thermostat OFF	13°C (55°F)	

## Generator Models and Kits

Kit Number	Generator Models
GM102231-KP1-QS	14RESA/RESAL - 120 VAC
GM102231-KP2-QS	14RESA/RESAL - 240 VAC
GM102231-KP3-QS	20RESA/AL/B/C/CL/D - 120 VAC
GM102231-KP4-QS	20RESA/AL/B/C/CL/D - 240 VAC
