Description

The breather tube and oil heater kit is recommended for improved cold starting in locations where the ambient temperature drops below 0°C (32°F).

The breather tube heater wraps around the crankcase breather tube below the air cleaner. The oil heater is inserted into the oil drain port and includes a port for the oil drain valve. The oil heater power cord connects to the breather tube heater.

Breather tube and oil heater kits are available in 120-volt versions. Kits include a 3-way extension cord to allow connection of multiple AC accessories.

Note: The heaters require a continuous source of AC power that is backed up by the generator set.

Oil Heater Specifications

Kit Number	GM110949-KP1-QS GM110949-KP2-QS
Voltage	120 VAC
Watts	75 W
Thermostat ON	4°C (40°F)
Thermostat OFF	13°C (55°F)

Breather Tube Heater Specifications

Kit Number	GM110949-KP1-QS	GM110949-KP2-QS
Voltage	120 VAC	120 VAC
Watts	5 W	10.4 W
Thermostat ON	4°C (40°F)	4°C (40°F)
Thermostat OFF	13°C (55°F)	13°C (55°F)
