KTSE-1

ATTENTION: JUMPER MUST BE INSTALLED OR THE PRODUCT WARRANTY WILL BE VOIDED. (See Install Sheet)

## Features

- Daisy Chain RXT transfer switches
- Eliminates need for RDT switch as slave switch
- Simple four wire hook-up. No cutting or splicing required
- Transfer switch control board plug, connects directly into the RXT Expander
- Packaged complete with all necessary components for a successful installation
- LED Indicator confirms utility or transfer mode
- Maintenance free, requires no batteries or adjustments
- RXT control board can be removed from slave transfer switches
- Small footprint that easily installs in transfer switch enclosure where control board was located
- One unit required for each slave switch being installed
- 5 Year Warranty
- It is highly recommended to install a surge protection device on the line side of the master switch
